## Our planet earth paragraph writing

Save Paragraph Earth: Our planet is on the brink of destruction. The years of violence we humans have delivered on our planet that took a toll on it and walk towards a point of hopelessness. We are the children of mother's land, and it is our responsibility to save our land. You can read more paragraphs about articles, events, people, sports, technology. Save The Earth-100 Words for Class 1, 2, 3The Main Cause of Our Planet's Destruction Has Been. From the oceans by the land and even mountains. Covers from the dirt and the dirt everywhere. Our earth is the associations, and we have to work immediately to prevent us from becoming dead planets. The most basic thing we can do is limit our pollution activities. We need to adopt phase three of 'low, reuse, and recycling' to limit the amount of waste we create. We can recycle plastic to avoid the entire surface of our planet. On the paragraph save the Earth-150 words for Class 4, as 5As, it is our primary responsibility to take care of the planet that we call our home. The earth provides us with all the basics that we need for our survival. Nat, we greedy humans have exploited its resources to such an extent that even the most needs are not available to some people. To be responsible residents of this planet, we must take some steps to reuse the damage caused by our planet. He's seen a lot of exploitation. We're going to cut the trees reclicsily for our use. Every tree is lost, the earth lose a part of itself. We need to plant as many trees because we are in our limited lives to bring back the last lush green forests to life. If we can all plant a plant, every year, the earth will be filled with about 7,000,000,000 trees a year. Save paragraphs on earth-200 words for class 6, 7, 8The basic needs of by earth have been easily done. But, with the addition of industrealsm, we humans have become greedy and careless. We have been to the darigh taraji without giving nothing to the resources of the land. The principle of the process of life on earth works on the basic concept of harmony. There is perfect harmony between different levels and areas of lafalikeness, the Browser, the Singi circle, the environment, and the climate arena. When interacting with each other in perfect harmony in all fields, we get a healthy and living earth. But sadly, we have influenced the work of all the areas that have caused imbalances in the harmony of earthlife processes. The lack of rivers, polluted air and land, the sea swelled with water and trees above the snow is the main reason for this imbalance. But instead of sitting on it and crying, we have to work immediately . Some important steps need to be taken to restore the earth to its previous glory. Some of these steps are: Planting more trees to improve air quality, neutral dirt is not allowed to be thrown directly into the rivers, An eye on industrialists who taunt the quality of pollution, and most importantly, decide our actions from a moral perspective. The paragraph sits on the safe earth-300 class for words 9, 10, 11, 12 and competitive immaterial scales. This balance has been a roll in favour of mass destruction on our planet. The earth has associations with toxic smoke, its water bodies are focused with plastic and the water bodies instead of marine life, there is chaos on our planet at the time. As of now, there are more plastic bags in our ocean than the fish exist you should be forced to sit and think and take a moment. What have we done on our land? Is the human population ready for this? These are some questions that are worth asking. Let's start with you first. We have succeeded in maintaining our part of keeping the earth healthy? If you think you're doing enough, you need to do more. The situation is important, and the next few years will determine how far we will go as civilization. With the modern environmental crisis becoming a natural affair, it is difficult to imagine what might be in the next few years. We
